

Head to this website: <https://www.imgonline.com.ua/eng/impose-picture-on-another-picture.php>

Scroll down to the first section. Click "Choose File" and upload your photo. Click on the second "Choose File" and upload your frame.

1) Select 2 images in BMP, GIF, JPEG, PNG, TIFF format:

no file selected

no file selected

In the second section, click the second option "Overlay PNG, GIF, TIFF image with transparent background". Change the transparency of 2nd image to 0%.

2) Image overlay settings:

Overlay type for 2nd image:

- Overlay 2nd image and make it transparent
- Overlay PNG, GIF, TIFF image with transparent background

Transparency of 2nd image: % (from 0 to 100, 0="non-transparent", 100="fully transparent")

(If selected «Overlay PNG, GIF, TIFF with transparent background» – this parameter will be ignored)

In the third section, change the quality to 100% and click on "OK".

3) Output image format

- JPEG with quality (from 1 to 100)
- PNG-24 (without compression, 100% transparency support)

Copy EXIF and other metadata of the 1st picture? Yes No

Processing usually lasts for 0.5-30 seconds.

You can download the photo on the next page.

Images processing result
