

Council of Science Editors (CSE) Style Format Guide

CSE name-year citation style is used in the Biology department at Augustana College. This formatting guide will assist you in citing sources correctly. For additional examples, consult *Scientific Style and Format: The CSE Manual for Authors, Editors and Publishers*, 7th Edition, found at REF T11.S386 2006 and at the reference desk to make these corrections.

RefWorks, on the library page at <http://www.augustana.edu/library>, allows you to import, store and create bibliographies in CSE style. Not all databases import citations correctly, so you are responsible for modifying your bibliography using this guide and the text mentioned above.

Follow the basic format tips explained here and then adapt to the particular type of resource you are using. Each example will give the general formatting rules and then an example. The most important factor is to be consistent in your approach.

Some tips for name-year system according to the CSE style manual:

- Each group of bibliographic elements is separated by a period.
- Elements within a group of equal weight are separated by commas.
- For ten or less authors, include all authors in the bibliographic citation. The in-text citation may use all the names or enough names and et al. to indicate source.
- If the date includes month and day, list as year month day. Abbreviate month to three letters.
- Journal abbreviations are required for CSE style. Use the National Library of Medicine search at <https://www.ncbi.nlm.nih.gov/nlmcatalog/journals> to look up journal title and choose NLM abbreviation option.
- Single word titles are not abbreviated.
- In-text references consist of surname of author(s) and year of publication enclosed in parentheses.
- Works without an identifiable author and no editor should be started with organization or title, then date.
- An editor assumes place of the author if no author can be determined.
- If authors are named, then editor name is optional.

If there are multiple authors to your source (regardless of source), you must list all authors in your bibliographic citation. The in-text citation can be done in one of two ways:

Martini FM, Timmons M, Tallitsch RB. 2008. Human anatomy. 6th ed. San Francisco: Benjamin Cummings.

Option 1: Utilize the abbreviated format: (Martini et al. 2008)

Option 2: List all authors: (Martini, Timmons, Tallitsch 2008)

Book:

Author(s) or editor(s). Year. Title. Edition if other than first. Place of publication: publisher name; page(s) cited.
