**Note:** Throughout the report, results for the Group are compared to the Institution and to the IDEA database. Institutional norms are based on courses rated in the previous five years provided at least 400 classes were rated during that time. IDEA norms are based on courses rated in the 1998–1999, 1999–2000, and 2000–2001 academic years.

## Description of Courses Included in This Report

<b>Number of Classes Included</b>	
Diagnostic Form	335
Short Form	0
<b>Total</b>	<b>335</b>
Number of Excluded Classes	9
<b>Response Rate</b>	
Classes below 65% Response Rate	17
Average Response Rate	89%
<b>Class Size</b>	
Average Class Size	19

**Number of Classes:** The confidence you can have in this report increases with the number of classes included. Classes were excluded if faculty members neglected to select Important and Essential objectives. If more than 10 percent of the eligible classes were excluded, the results may not be representative of the Group.

**Response Rate:** A 75% response rate is desirable; 65% is the minimum for dependable results.

The following provides information about the degree to which various learning objectives are emphasized in courses. The percent of classes for which each objective was chosen helps evaluate whether or not program objectives are addressed with appropriate frequency.

In general, it is recommended that 3–5 objectives be selected as Important or Essential for each class. When more than 5 objectives are chosen, effectiveness ratings tend to be adversely affected, perhaps because instructors are trying to accomplish too much.

The information in this section can be used to explore such questions as:

- Are the goals of the program being appropriately emphasized in course sections?
- Are the objectives emphasized consistent with this Group's mission?
- Are some of the Group's curricular goals under- or over-emphasized?
- Are the under-emphasized objectives addressed in another way?
- How does this Group's emphasis compare with the Institution and IDEA?
- On average, are faculty members selecting too many objectives?

<b>Objective 4:</b> Developing specific skills, competencies, and points of view needed by professionals in the field most closely related to this course	40%	NA%	55%

<b>Average Number of Objectives Selected As Important or Essential</b>	4.7	NA	5.7

The quality of instruction in this unit is shown as judged by the four overall outcomes.

"A. Progress on Relevant Objectives" is a result of student ratings of their progress on objectives chosen by instructors. Ratings of individual items about the "B. Excellence of the Teacher" and "C. Excellence of Course" are shown next. "D. Summary Evaluation" averages these three after double weighting the measure of student learning (A). Results for both "raw" and "adjusted" scores are shown as they compare to the IDEA Database. Use results to summarize teaching effectiveness in the Group.

**Part 1: Distribution of Converted Scores Compared to the IDEA Database**

Converted Score Category	Expected Distribution	A. Progress on Relevant Objectives		B. Excellence of Teacher		C. Excellence of Course		D. Summary Evaluation (Average of A, B, C) <sup>1</sup>	
		Raw	Adjstd	Raw	Adjstd	Raw	Adjstd	Raw	Adjstd
<b>Much Higher</b> (63 or higher)	10%	7%	3%	6%	4%	12%	7%	7%	3%
<b>Higher</b> (56–62)	20%	28%	19%	31%	24%	24%	16%	29%	20%
<b>Similar</b> (45–55)	40%	49%	52%	39%	41%	36%	42%	46%	49%
<b>Lower</b> (38–44)	20%	12%	16%	15%	18%	15%	18%	12%	18%
<b>Much Lower</b> (37 or lower)	10%	4%	10%	10%	13%	12%	18%	6%	10%

Part 1 shows the percentage of classes in each of the five performance categories.

- Is the distribution of this Group's classes similar to the expected distribution when compared to IDEA?

Part 2 provides the averages for the Group and for IDEA norms.

- Are the Group's averages higher or lower than IDEA?

**Part 2: Average Scores**

Converted Score	This Summary Report		IDEA System	
This Summary Report	52	49	51	49
IDEA System	51 <sup>2</sup>	51 <sup>2</sup>	50	50
5-point Scale	This Summary Report		IDEA System	
This Summary Report	4.0	3.8	4.2	4.1
IDEA System	3.8	3.8	4.2	4.2

<sup>1</sup> Progress on Relevant Objectives is double weighted in the Summary Evaluation.

<sup>2</sup> The IDEA Average is slightly higher than 50 because Essential objectives are double weighted and students typically report greater learning on objectives that the instructor identified as Essential to the class.

Use results to summarize teaching effectiveness in the Group. To the degree that the percentages of the Group's classes in the two highest categories exceeds 30% (Part 1), teaching effectiveness appears to be superior to that in the comparison group. Similarly, if the Group's converted average exceeds 55, and its average on the 5-point scale is 0.3 above that for the comparison group (Part 2), overall teaching effectiveness in the Group appears to be highly favorable.

Part 3 shows the percentage of classes with ratings at or above the converted score of the IDEA databases. Results are shown for both raw and adjusted scores. When this percentage exceeds 60%, the inference is that the Group's overall instructional effectiveness was unusually high.

Results in this section address the question:

- How does the quality of instruction for this Group compare to the national results?

**Part 3: Percent of Classes at or Above the IDEA Database Average**

**Part 1: Distribution of Converted Scores Compared to This Institution**

This section compares the quality of instruction in this Group to your entire Institution in the same way as it was compared to all classes in the IDEA database (Section II, page 3).

**Part 1** shows the **percentage of classes** in each of five categories.

- Is the distribution of this Group's classes similar to the expected distribution when compared to the Institution?

**Part 2** provides the **averages** for the Group and for Institutional norms.

- Are the Group's averages higher or lower than the Institution?
- Is the Institution (compared to IDEA) higher or lower than the IDEA system average? (See page 3 for IDEA System averages.)

Note: Institutional norms are based on courses rated in the previous five years.

<sup>1</sup> Progress on Relevant Objectives is double weighted in the Summary Evaluation.

**Part 3: Percent of Classes at or Above This Institution's Average**

**Part 3** shows the percentage of classes with ratings **at or above the converted score of This Institution**. Results are shown for both raw and adjusted scores.

Results in this section address the question:

- How does the quality of instruction for this Group compare to the Institution?

Tables in this section compare ratings of progress and "relevance" for the 12 objectives for this Group, with ratings for other classes at your institution and for all classes in the IDEA database. The tables on the left side of the page report averages (raw and adjusted) for the Group and the two comparison groups; they also display the number of classes for which the objective was selected as "relevant" (Important or Essential). For each of these groups, progress ratings are reported only for "relevant" classes.

By comparing progress ratings across the 12 learning objectives, you can determine if there are significant differences in how well various objectives were achieved. Since students rate their progress higher on some objectives than on others, conclusions may need to be modified by comparing the Group's results with those for the Institution and/or IDEA. Results in this section should help you determine if special attention should be given to improving learning on one or more objective(s). Results in the section are of special value to accrediting agencies and assessment programs.

**Raw Average:** Answers accreditation/assessment questions related to how well each objective was achieved; these are indicators of self-assessed learning.

**Adjusted Average:** Useful primarily in comparing instructors or classes; they "level the playing field" by taking into account factors that affect learning other than instructional quality.

**Bar Graphs:** Useful in determining if "standards" or "expectations" have been met. For example, you may have established a target requiring that at least 50 percent of classes pursuing a given objective should achieve an average progress rating of at least 4.0. If this expectation was achieved, the darkest bar will exceed the 50% level. By comparing the Group's results with those for the IDEA database and the Institution, you can also make inferences about the rigor of the standards you have established for the Group.

This section is intended to support teaching improvement efforts. The 20 teaching methods assessed in the IDEA system (grouped into five "approaches" to teaching) are listed. The number of classes for which a given method was related to relevant (Important or Essential) objectives is indicated in the second column, and the third and fourth columns show the average and standard deviation of ratings. The graph on the right hand side of the page contains the information most pertinent to instructional improvement.

It shows the percentage of classes where the method was employed relatively frequently (a positive finding) or relatively infrequently (a negative finding). It is suggested that teaching improvement efforts be focused on methods/approaches where the dark bar (infrequent use) is greater than 30%, especially if the method is important to objectives in many classes (column 2).

335 classes in this Group used the Diagnostic Form.

<sup>1</sup> Approximately two-thirds of class averages will be within ±1 standard deviation of the group's average.

**Part A** describes student motivation, work habits, and academic effort, all of which affect student learning. The table gives averages for this Group, your Institution, and the IDEA database. It also shows the percentage of classes with averages below 3.0 and 4.0 or above. Although the information in this section is largely descriptive, it can be used to explore such important questions as:

- Is there a need to make a special effort to improve student motivation and conscientiousness?
- Are these results consistent with expectations?
- Does the percent of classes below 3.0 or 4.0 or above raise concerns or suggest strengths?

Averages for classes in this report are considered "similar" to the comparison group if they are within  $\pm .3$  of the Institution or the IDEA average, respectively.

**Part B** provides information about course characteristics. Some of the questions addressed are:

- When compared to the IDEA and Institutional databases is the amount of reading, work other than reading, or difficulty for courses included in this summary report unusual?
- Are these results consistent with expectations?
- Does the percent of classes below 3.0 or 4.0 or above raise concerns or suggest strengths?

Averages for classes in this report are considered "similar" to the comparison group if they are within  $\pm .3$  of the Institution or the IDEA average, respectively.

**Part C** summarizes students' responses to *As a result of taking this course, I have more positive feelings toward this field of study.* This item is most meaningful for courses taken by many non-majors.

Some of the questions addressed are:

- Are students developing a respect and appreciation for the discipline?
- Is the average Converted Score above or below 50 (the average for the converted score distribution)?

**C. Improved Student Attitude**

40. (16) As a result of taking this course, I have more positive feelings toward this field of study.

### A. Primary and Secondary Instructional Approaches

This table shows the relative frequency of various approaches to instruction. The success of a given approach is dependent on the class objectives, but since students have different learning styles, it is generally desirable that they be exposed to a variety of approaches. Instructors reported this information on the *Faculty Information Form*.

	Number Rating: 335		Percent indicating instructional approach as:	
			Primary	Secondary
Lecture			50%	20%

### B. Course Emphases

This section shows the degree to which classes in this area expose students to various kinds of academic activities. Generally, proficiency is related to the amount of exposure. Are we giving students enough opportunity to develop the skills they need after graduation? Instructors reported this information on the *Faculty Information Form*.

	Number Rating	Percent indicating amount required was:		
		None or Little	Some	Much

### C. "Circumstances" Impact on Learning

How instructors regard various factors that may facilitate or impede student learning is shown here. Until research establishes the implications of these ratings, administrators should make their own appraisal of whether or not ratings of student learning were affected by these factors. Instructors reported this information on the *Faculty Information Form*.

	Number Rating	Percent indicating impact on learning was:
